

BizTek Academy

Build the capability to run what you have built — practical training for operators, engineers and managers, and open workshops for founders and leaders.

WHO IT IS FOR

- Electronics plants ramping up a new line or shift
- Quality and engineering teams preparing for audits
- Promoters and MSME owners planning a new project
- Teams taking over a project at handover

WHY BIZTEK

- Trainers from the shop floor, not the classroom
- Certified courses taught only by certified trainers
- Measured: before, after and 60 days later on the floor

WHAT YOU GET

In-plant programmes

Per day / batch

SMT process and soldering, IPC-A-610 and J-STD-001 (through IPC-certified trainers), ESD control, 7 QC tools, SPC, FMEA, 8D, MSA, APQP / PPAP.

Operations and management

Per day / batch

Lean, 5S and TPM, internal auditor (ISO / IATF), project management on the six-gate method, first-time managers.

Handover training

At project end

Operator and maintenance training at the end of every project BizTek manages, with records for your files.

Open workshops

1–2 days

Bank-ready DPR in two days · Building an electronics factory: the six gates · Incentives for ESDM · CXO bootcamp · Certification for market access.

HOW WE WORK

01

Assess

Skills gap and the result you need on the floor

02

Design

Programme, content and assessments for your line

03

Deliver

In your plant, at a venue or online, up to 25 per batch

04

Measure

Pre / post scores and a 60-day floor check

STANDARDS

Our quality commitment

- Certified courses only by trainers certified for them
- Every programme has a pre- and post-assessment
- A 60-day follow-up: what changed on the shop floor
- Content tailored to your products, line and standards

Works with: Project Management (handover) · Testing & Certification (IPC and quality) · CXO on Call (team building)

Timelines assume your inputs reach us on schedule — see the Client Project Execution Guide (response times, deemed acceptance, standby).
